Summary

Zaid Mohammed Abbas originally from small city (Suwayrah) in the middle of Iraq, surrounded by farms so I worked as farmer before I started an academia job. I studied my Bachelor and M.S. degree in organic chemistry at AL-Nahrain University, Baghdad Iraq. Then, between 2009 -2012 I had worked as Teaching Assistant in University of Wasit. During this period 2010 -2012 I had worked with Dr. Khalidah S. Merzah group to prepare some nanoparticles. I am a very social person and I am trying to work collectively to reach my goal of making science the forefront of all countries' interest through intercultural convergence and the transfer of evolution around the world. I joined Dr. Brian Benicewicz's group in 2014 to work on research in polymer chemistry, with a focus on RAFT polymerization and polymer nanocomposites.

Education

PhD. in chemistry (organic polymer chemistry)	Dec2018
University of South Carolina	Columbia, SC
Advisor: Dr. Brian Benicewicz	
M.Sc. in Chemistry (organic polymer chemistry)	May 2008
Al-Nahrain University	Baghdad, Iraq
Advisor: Dr. Ayad Jassim	
Iraqi Chemical Society Certification
